

Prostate cancer is

the most commonly
diagnosed urological
cancer

the most common
cancer in men in
Ireland

Excl. NMSC

5-year survival rate

94%

of patients are alive five years
after a prostate cancer diagnosis

Prostate cancer
survival is among
the highest of any
cancer type

Rapid access prostate
clinics centralised
diagnosis to cancer
centres for men 50-70
years of age

4,500+
prostate cancer
cases diagnosed
per year

Treatment has shifted toward active surveillance
for suitable low risk cases. There has also been an
increase in robotic-assisted surgery
